LIGHTING TECHNOLOGY

HEADLAMP SYSTEMS

All basic systems are supplied with stainless steel base plates, pre-primed headlamp masks and where applicable with electronic xenon controls
In addition to the actual lamp system an electronic control has to be used depending on the model year
This is necessary for a seamless switching from low to high beam
In some countries approval by a Technical Inspection Authority might be necessary

- XE33 463 07 D **A.R.T. PREMIUM High Bi-XENON from model 11/2006**
See picture B1, B2, B3
- XE33 463 00 D **A.R.T. PREMIUM High Bi-XENON until model 10/2006**

ENGINE

Attention: The performance enhancements stated below must be registered with the TÜV (German Technical Inspectorate), otherwise the vehicle's roadworthiness certificate will be invalidated. The car insurer must also be informed to ensure full insurance cover is retained.

PERFORMANCE INCREASE PETROL ENGINES

We recommend for all A.R.T. tuned engines the use of petrol with at least 98 octane
A.R.T. performance increases do not affect the emission tax classification

AS55 463 00 D A.R.T. Performance Kit AS55K for G55K

Consisting of:

- Belt pulley set for boosting compression ratio
- Flow-efficient exhaust manifold
- 6-pipe stainless steel sports exhaust system
- Metal sports catalytic converters
- 76mm Y-pipes
- High-performance engine control
- Vmax removal
- Optimized transmission control adapted to new performance
- Transmission-oil cooler system
- Charge-air cooling system with pump
- Large charge-air cooler

Performance approx. 442KW (601 metric hp), 800Nm, Vmax approx. 260km/h (160mph)*

*Speed values may vary and depend on the equipment and tire size

Only for export, no TÜV permission in Germany

DIESEL POWER

Optimization with additional electronic control unit

The only tuning variant for vehicles certified according to Euro 5 emission standard 715/2007 EEC, and for which part certificates according to §19 Section 3 of the German road transport licensing regulations (StVZO) can still be obtained. Other tuning measures are no longer permitted.

The original manufacturer's software is not altered.

The software of the engine safety functions remains untouched. The risk of damage to the engine is slight to non-existent due to extensive legally prescribed tests. The additional electronic control unit can be removed again at any time without leaving any residue.

All modules with TÜV approval according §19(3) StVZO and e1 approval table.

All performance enhancement values are average values. Deviations between +/-5% are possible due to the test conditions.

DP40 250 56M D **A.R.T. DIESEL POWER MODUL**

For basis 400CDI 250Hp 184kW 560Nm

modul for optimization of engine control

performance increase to 220kW 299Hp 660Nm

24 month guarantee insurance according to NSA guarantee conditions

See picture D5

DP32 224 51M D **A.R.T. DIESEL POWER MODUL**

For basis 320CDI 224Hp 165kW 510Nm

modul for optimization of engine control

performance increase to 194kW 265Hp 601Nm

24 month guarantee insurance according to NSA guarantee conditions

See picture D5

DP35 231 54M D **A.R.T. DIESEL POWER MODUL**

For basis 350CDI 231Hp 170kW 540Nm

modul for optimization of engine control

performance increase to 199kW 270Hp 632Nm

24 month guarantee insurance according to NSA guarantee conditions
