SUSPENSION

- TL01 164 00 D **A.R.T. Electronic suspension system for Airmatic**
 Lowering of 35mm
 Individually adjustable up to 70mm lower
 All electronic systems remain unaffected: suspension adjustment from the driver's seat, electr. workshop diagnosis, traction and stability control
- TL01 164 FT A Installation A.R.T. Electronic suspension system
- VM01 100 00 A Electronic measurement and alignment of the vehicle

ENGINE

Attention: The performance enhancements stated below must be registered with the TÜV (German Technical Inspectorate), otherwise the vehicle's roadworthiness certificate will be invalidated. The car insurer must also be informed to ensure full insurance cover is retained.

DIESEL POWER MODUL

Optimization with additional electronic control unit
 The only tuning variant for vehicles certified according to Euro 5 emission standard 715/2007 EEC, and for which part certificates according to §19 Section 3 of the German road transport licensing regulations (StVZO) can still be obtained. Other tuning measures are no longer permitted.

The original manufacturer's software is not altered.
 The software of the engine safety functions remains untouched. The risk of damage to the engine is slight to non-existent due to extensive legally prescribed tests. The additional electronic control unit can be removed again at any time without leaving any residue.

All modules with TÜV approval according §19(3) StVZO and e1 approval lable.

All performance enhancement values are average values. Deviations between +/-5% are possible due to the test conditions.

- DP42 306 70M D **A.R.T. DIESEL POWER MODUL**
 For basis 420CDI 306Hp 225kW 700Nm
 modul for optimization of engine control
 performance increase to 263kW 358Hp 805Nm
