Engine

Attention: The performance enhancements stated below must be registered with the TÜV (German Technical Inspectorate), otherwise the vehicle's roadworthiness certificate will be invalidated. The car insurer must also be informed to ensure full insurance cover is retained.

DIESEL POWER MODUL

Optimization with additional electronic control unit

The only tuning variant for vehicles certified according to Euro 5 emission standard 715/2007 EEC, and for which part certificates according to §19 Section 3 of the German road transport licensing regulations (StVZO) can still be obtained. Other tuning measures are no longer permitted.

The original manufacturer's software is not altered.

The software of the engine safety functions remains untouched. The risk of damage to the engine is slight to non-existent due to extensive legally prescribed tests. The additional electronic control unit can be removed again at any time without leaving any residue.

all modules with TÜV approval according §19(3) StVZO and e1 approval label

All performance enhancement values are average values. Deviations between +/-5% are possible due to the test conditions.
