**A classic of the future – arriving in a timeless premium design:**

## **The A.R.T. G streetline 65 based on the Mercedes-Benz G55 AMG**

What have Eric Clapton, Tina Turner and some of the Popes in common? They are all drivers of the famous Mercedes-Benz G-Class. For a long time, the G-Wagen was the epitome for a German off-road vehicle. And it was the G55 with its V8 compressor engine that particularly caught the attention of the customisation specialists from A.R.T. and inspired them to create a new tuning masterpiece.

The A.R.T. G streetline 65 Wide Body Kit makes the appeal of the G-Class even more irresistible. Two LED fog lights and one LED daytime running light on each side form the LED Triple Beam lamp set on the front bumper with integrated spoiler. Further features of this exceptional tuning package are wheel arch extensions and LED running board illumination, side skirts with LED under-car illumination and a rear bumper with integrated spoiler. All these elements added together make for an unforgettable appearance likely to cause the mouths of all aficionados to water.

It does not matter where you let your eyes drift. It can be over the sporty looking A.R.T. G streetline aero bonnet or the distinctive A.R.T. G streetline roof spoiler. There again, they may be caught by the A.R.T. G streetline hard chrome plated sports exhaust system comprising 3-plus-3 80 mm tailpipes, or captured by the stainless steel inserts for the door trim on the side. Certainly, the exterior of the A.R.T. G streetline 65 leaves nothing to be desired.

Customers choosing the optional A.R.T. chrome package also get a stainless steel trim set for the air intake above the front wheel arches and the air inlet on the bonnet. In terms of wheels and tyres, the customer has the choice between 10x22" A.R.T. monoART1 wheels with 295/35R22 tyres and 11x23" A.R.T. forgeART1 wheels with 305/35R23 tyres. Even the performance level of the A.R.T. G streetline 65 can be improved in different ways. The tuning specialists from A.R.T. can produce up to a maximum output of 588 kW/800 bhp.

The interior of this very special G-Class also exceeds all expectations. A.R.T. offers a fine Nappa/Alcantara (2-coloured with contrast stitching) leather upholstery featuring an individual diamond-stitching design. The elegant and ergonomically designed sports steering wheel combines visual and tactile perfection. The optional bi-color roof liner and the individual rear seats with a centre console and an illuminated mini bar are just a few more reasons which one would never like to get out of the A.R.T. G streetline 65.

There is simply no way to travel with more superiority and style.

A.R.T. press release, Sept. 2013
