

## **Big style SUV fascination:**

### **The A.R.T. GL Mammut.2 –**

### **A noble tuning version of the Mercedes-Benz X166 GL350**

What a mighty appearance: the Mercedes-Benz X166 GL350. It not only impresses with its power output of 310 bhp (228 kW) and a torque of 700 Nm but also with its enormous dimensions of 5120 × 1934 × 1850 mm. The tuning experts A.R.T. have made this four-wheeled giant even more gigantic with the creation of the A.R.T. GL Mammut.2 – an SUV the like of which the world has not seen before.

The A.R.T. GL Mammut.2 Wide Body Kit underlines at first sight that this vehicle will truly be an Alpha among vehicles on the road. The front bumper with integrated spoiler is equipped with an LED Triple Beam lamp set comprising one LED high beam, one LED fog light and one LED position light on each side. The dominant looks of this car are even more underlined by the sporty radiator grille “Edelstahl” (stainless steel), the muscular wheel arch extensions, the athletic rear bumper with integrated spoiler and the A.R.T. GL Mammut.2 exhaust system with four hard chrome plated 100 mm tailpipes.

In terms of wheels, the customer has a choice between the 10x22” A.R.T. monoART1 wheels with 285/35R22 tyres and the 11x23” A.R.T. forgeART1 wheels with 305/35R23 tyres. The interior of the “mammoth” offers even more choices for the customer since the premium car tuners from A.R.T. can arrange everything from high-quality leather seats and an ergonomic sports steering wheel right up to high quality wood trim according to individual tastes. There are thus plenty of great opportunities to make a unique vehicle even more unique.

A.R.T. press release, Sept. 2013
